Human Capital Management: IrisTime™ iT100

<image>

TimeTerminal OPERATING ON THE IT100 IS A TECHNOLOGY SUPER COMBINATION

TimeTerminal can be installed on the IrisTime iT100 time clock. This combination gives you best-in-class biometric capability as well as safe employee time punching. Iris and face recognition technology is used to identify employees — EVEN if they're wearing a mask or PPE.

Automatic iris and face recognition with TimeTerminal advantages

Employees clock in and out using the iT100. With its dual biometric iris and face recognition reader, the iT100 provides fast, accurate, and convenient authentication of employees. Personnel can either interact with the iT100 on-screen functions or simply present their face to automatically punch for their shift.

In addition, TimeTerminal enables a wide variety of functions and features for the iT100. Along with punching in and out for their shift, employees can transfer departments, review their timecard, schedules, and benefit balances. Data synchronizes in real-time to host systems in the cloud. Using the TimeTerminal app enables employers to comply with constantly changing labor laws and regulations.

WHAT IS INCLUDED?

Features of the iT100 ensure your workplace is safe and secure for everyone. Here are some of the key features:

- Iris and face recognition
- Anti-spoofing countermeasures
- Non-contact authentication
- 7 inch multi-touch display
- Automatic tilt adjustment
- Large capture volume
- Advanced security

EMPLOYEE QUESTIONS (ATTESTATIONS)

TimeTerminal on the iT100 enables employers to acquire specific information from their workforce through an attestation process. For example, workers can be required to answer health-related questions before beginning a shift. User-defined questions also may require employees to acknowledge taking legally-mandated breaks and affirm that no injuries occurred upon employees punching out for their shift. Employees also may use iT100 readers with TimeTerminal to check benefit balances, such as accrued vacation, sick, and PTO time.
